

Securing Pitched Warm Roofs

This CPD certified seminar examines the various advantages of pitched warm roof construction and provides specifiers with an understanding of the structural loads involved that must be considered.

In this one hour seminar we also address the benefits of using InSkew structural batten fixings with regard to Building Regulations including Part L, cost-effectiveness and their resistance to sliding and compressive loads and wind uplift. There is a Q&A session and certificates will be issued.

Seminar programme

- Helifix Technical Expertise
- Warm Roof Construction
- InSkew Development & Testing
- InSkew Project Designs
- Case Histories
- Summary
